

Letter from the Desk of Editor In Chief,

It gives me immense pleasure to write the Inaugural Editorial. The idea of coming up International Journal of Advanced Health Sciences was well planned few months back with all different sought of ideas coming up in my mind. Finally we are coming up with our first issue with the aim to promote research activities around the globe and contribute best possible articles to the existing literature.

The idea came up in our mind, when we observed that the world in which we are living has tremendous scope research and several people are also actively involved in it. But it was annoying to see that today's young generation (medical students) are not involved actively. They would have been the frontrunner and the future lies within their hand.

There are thousands of Medical and Dental students passing out every year, but hardly even around 10% of them would have got involved in any scientific projects or published research papers.

Hence, we came up with the idea to start with International Journal of Advanced Health Sciences, which would provide platform for medical students, research lovers and professionals to publish their research publications.

In time, the IJAHs will become a recognized forum for learning and exchange of ideas by and for medical professionals not only in India, but throughout the globe.

We encourage the new generation of health professionals to create and publish new research data in this journal and adopt critical thinking habits to address health problems which we face in our routine life. This journal will encourage international research collaborations that result in joint publications of high international standards.

Articles in the following categories are welcome:

Original Research, Reviews, Editorials, Letter to Editor, Rare Clinical Cases, Lessons from Practice, Diagnostic Dilemma, Viewpoint, Opinion, Hypothesis, Medico-Legal issue, etc.

Finally I would like to thank my colleague and Editor In Chief of this journal Dr. Safalya S. Kadtane and all Editorial Board members, who have taken all possible efforts to come up with the first issue and hope this journal has a great future with providing a perfect platform for research publication.

Dr. Swapnil S. Bumb
Editor In Chief
International Journal of Advanced Health Sciences
